2 location-based service provider to the image capture device, the information describing
3 how to wirelessly communicate with the at least one photo processing establishments.
- 1 5. The method of Claim 1, further comprising receiving from the image capture
2 device, a user selection indicating at least one of the one or more photo processing
3 establishments with which the service center is to subsequently communicate.

1 6. The method of Claim 5, further comprising receiving image data from the image
2 capture device.

1 7. The method of Claim 6, further comprising transmitting the image data to the at
2 least one selected photo processing centers.

1 8. The method of Claim 1, wherein the second location information is selected from
2 a database of photo processing establishments, and the selection is based, at least in
3 part, on a user's pre-defined preferences.

1 9. The method of Claim 8, wherein the user's pre-defined preferences are
2 established with the location-based services provider via a graphical user interface
3 running on a computer.

1 10. The method of Claim 8, wherein the user's pre-defined preferences are
2 established with the location-based services provider via a graphical user interface
3 running on the image capture device.

1 11. The method of Claim 1, further comprising transmitting attribute information, the
2 attribute information being associated with the one or more photo processing
3 establishments.

1 12. The method of Claim 1, further comprising generating the second location
2 information based, at least in part, on a user's preferences.

1 13. A method of providing a location-based service, comprising:
2 transmitting first location information from an image capture device to a location-
3 based services processing center; and
4 receiving second location information relative to the location of one or more
5 photo processing establishments.

1 14. The method of Claim 13, wherein the second location information comprises
2 geographical coordinates of one or more photo processing establishments.

1 15. The method of Claim 13, wherein the second location information comprises a
2 message in a format selected from the group consisting of text, graphics, audio, and
3 video.

1 16. The method of Claim 13, wherein the second location information comprises one
2 or more data files that, when displayed, appear as maps with the location of one or
3 more photo processing establishments marked thereon.

1 16. The method of Claim 13, further comprising transmitting one or more image data
2 files to a location-based services provider.

1 17. The method of Claim 13, further comprising transmitting one or more image data
2 files to at least one of the one or more photo processing establishments.

1 18. A method of providing hardcopy of image data, comprising:
2 receiving, at a photo processing establishment, customer identification
3 information from a location-based services provider;
4 receiving, at a photo processing establishment, image data from a location-based
5 services provider; and
6 printing the image data.

1 19. The method Claim 18, further comprising billing the charges associated with
2 printing the image data to the location-based services provider.

1 20. The method of Claim 18, further comprising billing the charges associated with
2 printing the image data to the a credit card account.

1 21. The method of Claim 18, further comprising shipping the printed image data to a
2 pre-determined addressed.

1 22. The method of Claim 18, further comprising:
2 receiving, at the photo processing establishment, instructions regarding the

3 processing of the image data; and
4 billing the charges associated with printing the image data to a credit card
5 account.

1 23. The method of Claim 18, further comprising:
2 receiving, at the photo processing establishment, instructions regarding the
3 processing of the image data; and
4 billing the charges associated with printing the image data to the location-based
5 services provider.

6 24. A method of providing hardcopy of image data, comprising:
1 receiving, at a photo processing establishment, customer identification
2 information from a location-aware image capture device;
3 receiving, at the photo processing establishment, image data from the location-
4 aware image capture device; and
5 printing the image data.
6

1 25. The method of Claim 24, wherein the customer identification information
2 comprises information identifying a location-based services provider; and further
3 comprising billing the charges associated with printing the image data to the location-
4 based services provider.
